Experiment 7 : Browser Automation Testing using Selenium (Python)

<u>Install selenium and webdriver-manager</u>

pip install selenium

pip install webdriver-manager

Step 1 Create Python Script

Create file:

selenium_login_test.py

Step 2 Import Required Libraries

```
from selenium import webdriver
from selenium.webdriver.common.by import By
from selenium.webdriver.chrome.service import Service
from selenium.webdriver.support.ui import WebDriverWait
from selenium.webdriver.support import expected_conditions as EC
from webdriver_manager.chrome import ChromeDriverManager
import time
```

Step 3 Start Browser

```
service = Service(ChromeDriverManager().install())
driver = webdriver.Chrome(service=service)

driver.get("https://the-internet.herokuapp.com/login")
driver.maximize_window()
```

Step 4 Wait for Page Elements

```
wait = WebDriverWait(driver, 10)
```

Step 5 Enter Login Credentials

```
username = wait.until(
EC.presence_of_element_located((By.ID, "username"))
)

username.send_keys("tomsmith")

driver.find_element(By.ID, "password").send_keys("SuperSecretPassword!")
```

Step 6 Click Login Button

```
driver.find_element(By.CSS_SELECTOR, "button.radius").click()
```

Step 7 Verify Login Success

```
message = wait.until(
EC.presence_of_element_located((By.ID, "flash"))
)

print("Login Message:", message.text)
```

Step 8 Logout

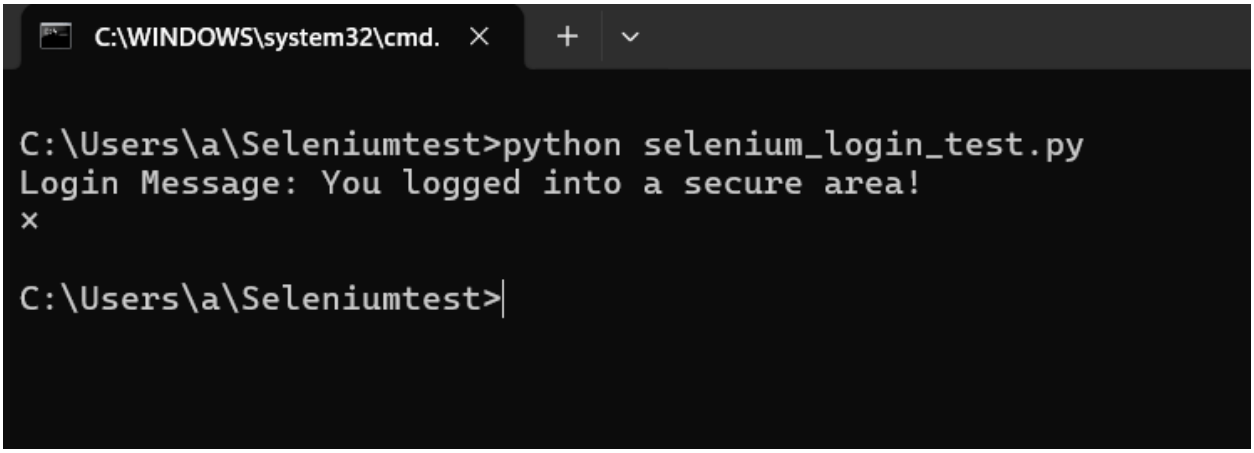
```
driver.find_element(By.CSS_SELECTOR, "a.button.secondary.radius").click()
```

Step 9 Close Browser

```
time.sleep(3)
driver.quit()
```

Step 10 Run test

```
python selenium_login_test.py
```



Task: Automate YouTube Search using Selenium

Write a Python script using **Selenium WebDriver** that performs the following steps:

The program should perform the following steps:

1. Open the **Chrome browser** using Selenium WebDriver.
2. Navigate to the website **https://www.youtube.com**.
3. Wait for **2 seconds** to allow the page to load.
4. **Maximize** the browser window.
5. Locate the **YouTube search box**.
6. Enter the text **"open source software"** in the search field.
7. Click the **Search button**.
8. Wait for **5 seconds** to view the search results.
9. **Close the browser**.
